# EMERGENCY CONTINGENCY PLAN

---

*“Service with Accountability”*

This contingency plan is designed to save critical downtime in the event of a power outage and/or emergency generator failure. Once the contingency plan is completed, you’re just one phone call away from having power restored, eliminating valuable downtime and guesswork.

The Plan Consists of:

- Visiting and inspecting job site
- Verifying location of electrical panel
- Removing panel cover to verify proper tie in, and location
- Verify tie in lugs needed
- Check amperage draw
- Check voltage
- Check and record phase rotation
- Locate proper location to park a temporary generator
- Verify cable length and cable ramps
- Label electrical panel with contact information

***FOR A LIMITED TIME***  
***AGS will provide the above service for \$225.00***

In addition to Generator Sales, Rentals & Service, we also offer: Auto Transfer Switch Cleaning & Calibration; Generator Load Testing; Infrared Imaging; and Fuel Delivery.

Sign below and return via fax (888-651-5901) or email: [jd@ags.la](mailto:jd@ags.la), to authorize AGS to schedule your ***Emergency Contingency Inspection***. If you have any questions, I can be reached at 562-505-2939.

Thank you,  
John Doornbos  
Sales Manager
